

Light source

LAMPE – 988-10

E27 LED, 8,5W · 806lm, 3000K

- Dimmable via switch
- Not suitable for external dimmer

The LED light source with E27 socket has a simple design. An integrated SWITCH dimmer is controlled via the conventional light switch and allows the brightness to be adjusted from 100% to 50% or 25%. The white glass of the light source filters the light and emits it gently into the surroundings. Modern LED technology is characterised by high light quality and energy efficiency. Compared to conventional halogen light sources, up to 80% of energy costs can be saved. LED light sources also have a long service life, generate less heat and protect the environment.
